## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beigel et al.

With respect to claim 1, figure 3 of the reference shows a second conductivity type region 36, of high concentration, on a front surface of a silicon substrate having n well region of low concentration. 26 is a first conductive type impurity region which surrounds 36, with a separation area 32. (26, 24 could also be identified as the first conductive type impurity region which surrounds 36.) 16 is interlayer dielectric. 44 is a metal interconnect formed on 36 and on the separation area. 40 connects this layer to 36. 30 is a second metal interconnect which almost fully covers 26 through 16, and connects to 26 through a hole in 16. It would have been obvious to one of ordinary skill that the PN junction between regions 32 and 22 form a diode, as required by the preamble. With respect to claim 2, the "border area" is read on the border of 32 adjacent 22, which lies laterally between region 32 and ring 26. With respect to claims 3-4, plug 34 is an electrode formed in the front surface of 32, formed at a predetermined distance from 26.

Art Unit: 2811

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

The supervisor for Art Unit 2811, Eddie Lee can be reached on (571) 272-1732. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
